NEELIMA KAKULAPATI

theneelimakakulapati@gmail.com | +91 6281969445 | LinkedIn | GitHub | Hyderabad, India

PROFESSIONAL SUMMARY

Final-year B.Tech Computer Science student (CGPA: 93%) specializing in Python development, machine learning, and NLP. Experienced in building end-to-end AI-driven applications — from data pre processing and model training to full-stack deployment. Seeking a role as a Python Developer or Data Analyst where I can deliver measurable impact through intelligent, data-driven solutions.

TECHNICAL SKILLS

Languages	Python, Java, C
Web	HTML, CSS, JavaScript, React, Tailwind CSS, Vite
ML / NLP	Pandas, NumPy, scikit-learn, Hugging Face, SpaCy, TextBlob
Frameworks	Streamlit
Databases	PostgreSQL, Firebase, Drizzle ORM
Tools	Git, GitHub, VS Code, Android Studio, Vercel, Railway

PROJECTS

◆AI-Powered News Summarizer & Sentiment Analyzer

- Developed a real-time NLP dashboard for summarization, sentiment analysis, and entity recognition using Hugging Face and SpaCy
- Built interactive UI using Streamlit and deployed end-to-end
- Automated text analysis workflows improving content processing efficiency

◆EV Charging Demand Forecasting

- Built ML model achieving 91% accuracy using scikit-learn
- Applied feature engineering on temporal and location data
- Generated predictive insights for EV charging demand optimization

◆Track-Save: Full-Stack Financial Portfolio Tracker

- Developed full-stack app using React, Tailwind, PostgreSQL, and Drizzle ORM
- Deployed using Vercel and Railway
- Enabled users to track and manage financial portfolios efficiently

INTERNSHIPS

◆Android Developer Virtual Internship — EduSkills

Oct 2024 – Dec 2024

- Developed 2+ Android applications using Java and Android Studio
- Integrated Firebase for real-time database and authentication
- Improved app responsiveness using cloud-based backend services

◆Generative AI Virtual Internship — Google Cloud (AICTE & EduSkills) Apr 2025 – Jun 2025

- Built GenAI apps using Gemini API for content generation and summarization
- Applied prompt engineering techniques to improve output quality
- Deployed AI workflows on Google Cloud Platform

◆AI & Data Analytics Internship — Shell India, AICTE & Edunet Jul 2025 – Aug 2025

- Analyzed energy datasets and built predictive models
- Applied preprocessing and feature engineering techniques
- Delivered insights through data visualization and reports

EDUCATION

B.Tech — Computer Science & Engineering 2023 – 2027

DVR & Dr.HS MIC College of Technology, Andhra Pradesh

- CGPA: 9.3 / 10 (93%)

Intermediate (Class XII) — Board of Intermediate Education, AP 2021 – 2023

Viswabharathi Junior College

- Aggregate: 95%

SSC (Class X) — Board of Secondary Education 2019 – 2020

Nagarjuna High School

- Aggregate: 100%

CERTIFICATIONS

- AWS Academy Graduate — Data Engineering
- NPTEL — Introduction to Industry 4.0 & Industrial IoT (Elite Badge, Score: 83%)
- Google Cloud — Cloud Technical Series (Gemini at Work Edition)
- UiPath & GeeksforGeeks — AI Agents Workshop
- Quantum Fundamentals Program — Amaravati Quantum Valley

ACHIEVEMENTS & ACTIVITIES

- Maintained perfect 100% in SSC and 95% in Intermediate, ranking among top students in the district
- Active participant in technical seminars, JAM sessions, and inter-college debate competitions
- NSS Volunteer — contributed 40+ hours to community service and social welfare activities
